INTRODUCTION

The existence of crime in our state is a concern not only of law enforcement but of our society as a whole. This report presents an overview of criminal activity in Delaware based upon the most commonly used measure of crime in the nation, the Uniform Crime Report.

The report presents data on the major crime classifications, Violent and Property, for the state and counties. It compares 1984 to the previous 5 years. It also contains data on victims and arrests.

MURDER 1984 SUMMARY

Murder represented only 0.9% of all violent crime in Delaware in 1984. A total of 25 murders were reported in 1984. This is the lowest annual level of murder in over 16 years and is 2 offenses less than reported in 1983. Murder has declined for the last 3 years from 40 offenses in 1981 (see graph). Delaware's murder rate was 4 per 100,000 population.

Twenty-two of the 25 murders were cleared for a clearance rate of 88%.

Firearms accounted for 50% of all weapons used, knife or cutting instruments made up 34.6%, and blunt instruments and other weapons represented 15.4%.

All but one of the 25 homicides involved one victim and one offender.

Almost 4 out of every 10 homicides involved a family relationship between the victim and offender. One-fifth involved strangers while one-third involved non-family such as friend, acquaintance, and other known.

The most common circumstances that led to the murder were brawl due to alcohol, other arguments, and lover's triangle.

Victims were mostly male (60%) and white (72%). The ages ranged from 6 to 73 years old with the ages 18-34 accounting for 56% of all victims.

Murder shows a great deal of variation in 1984. However, most monthly levels were far below the five year average levels.

MOTOR VEHICLE THEFT Very little seasonality was apparent in 1984 monthly levels of motor vehicle theft. Thefts remained fairly constant from January to June and peaked in July and August. Motor Vehicle Thefts in 1984 were at the lowest levels in over 15 years. This is clearly apparent with 1984 monthly levels being below 1979-1983 levels by an average of 78 motor vehicle thefts per month. The 1984 levels are only two-thirds the levels of 1979-1983.

Victim-to-Offender (VOR) totals listed above differ from Uniform Crime Report crime totals listed earlier in this report because of a difference in classification of incidents. If several offenses are committed at the same time by a person or group of persons, the VOR records all offenses committed. The UCR, in multiple offense situations, counts only the most serious offense and ignores all others in the incident. This is known as the Hierarchy Rule.

Also the VOR records all victim-to-offender relationships in multiple offender incidents. One assault may involve one victim but several offenders which would mean several victim to offender relationships. Therefore the report counts relationships rather than victims.
